CEFR Level: A2 towards B1 *The Oxford Handbook of Work Engagement, Motivation, and Self-Determination Theory* Marylene Gagne 2014 Self-determination theory is a theory of human motivation that is being increasingly used by organizations to make strategic HR decisions and train managers. It argues for a focus on the quality of workers' motivation over quantity. Motivation that is based on meaning and interest is showed to be superior to motivation that is based on pressure and rewards. Work environments that make workers feel competent, autonomous, and related to others foster the right type of motivation, goals, and work values. The Oxford Handbook of Work Motivation, Engagement, and Self-Determination Theory aims to give current and future organizational researchers ideas for future research using self-determination theory as a framework, and to give practitioners ideas on how to adjust their programs and practices using self-determination theory principles. The book brings together self-determination theory experts and organizational psychology experts to talk about past and future applications of the theory to the field of organizational psychology. The book covers a wide range of topics, including: how to bring about commitment, engagement, and passion in the workplace; how to manage stress, health, emotions and violence at work; how to encourage safe and sustainable behavior in organizations; how factors like attachment styles, self-esteem, person-environment fit, job design, leadership, compensation, and training affect work motivation; and how work-related values and goals are forged by the work environment and affect work outcomes.

The Unreasonable Virtue of Fly Fishing Mark Kurlansky 2021-03-02 National Outdoor Book Award Winner for Outdoor Literature From the award-winning, bestselling author of Cod-the irresistible story of the science, history, art, and culture of the least efficient way to catch a fish. Fly fishing, historian Mark Kurlansky has found, is a battle of wits, fly fisher vs. fish--and the fly fisher does not always (or often) win. The targets--salmon, trout, and char; and for some, bass, tarpon, tuna, bonefish, and even marlin--are highly intelligent, wily, strong, and athletic animals. The allure, Kurlansky learns, is that fly fishing makes catching a fish as difficult as possible. There is an art, too, in the crafting of flies. Beautiful and intricate, some are made with more than two dozen pieces of feather and fur from a wide range of animals. The cast as well is a matter of grace and rhythm, with different casts and rods yielding varying results. Kurlansky is known for his deep dives into the history of specific subjects, from cod to oysters to salt. But he spent his boyhood days on the shore of a shallow pond. Here, where tiny fish weaved under a rocky waterfall, he first tied string to a branch, dangled a worm into the water, and unleashed his passion for fishing. Since then, a lifelong love of the sport has led him around the world to many countries, coasts, and rivers--from the wilds of Alaska to Basque country, from the Catskills in New York to Oregon's Columbia River, from Ireland and Norway to Russia and Japan. And, in true Kurlansky fashion, he absorbed every fact, detail, and anecdote along the way. The Unreasonable Virtue of Fly Fishing marries Kurlansky's signature wide-ranging reach with a

subject that has captivated him for a lifetime--combining history, craft, and personal memoir to show readers, devotees of the sport or not, the necessity of experiencing nature's balm first-hand.

Tractor Wars Neil Dahlstrom 2022-01-11 "Mr. Dahlstrom...has written a superb history of the tractor and this long-forgotten period of capitalism in U.S. agriculture. We now know the whole story of when farming, business and the free-market economy diverged, divided and conquered." —Wall Street Journal Discover the untold story of the “tractor wars,” the twenty-year period that introduced power farming—the most fundamental change in world agriculture in hundreds of years. Before John Deere, Ford, and International Harvester became icons of American business, they were competitors in a forgotten battle for the farm. From 1908-1928, against the backdrop of a world war and economic depression, these brands were engaged in a race to introduce the tractor and revolutionize farming. By the turn of the twentieth century, four million people had left rural America and moved to cities, leaving the nation’s farms short-handed for the work of plowing, planting, cultivating, harvesting, and threshing. That’s why the introduction of the tractor is an innovation story as essential as man’s landing on the moon or the advent of the internet—after all, with the tractor, a shrinking farm population could still feed a growing world. But getting the tractor from the boardroom to the drafting table, then from factory and the farm, was a technological and competitive battle that until now, has never been fully told. A researcher, historian, and writer, Neil Dahlstrom has spent decades in the corporate archives at John Deere. In Tractor Wars, Dahlstrom offers an insider’s view of a story that entwines a myriad of brands and characters, stakes and plots: the Reverend Daniel Hartsough, a pastor turned tractor designer; Alexander Legge, the eventual president of International Harvester, a former cowboy who took on Henry Ford; William Butterworth and the oft-at-odds leadership team at John Deere that partnered with the enigmatic Ford but planned for his ultimate failure. With all the bitterness and drama of the race between Ford, Dodge, and General Motors, Tractor Wars is the untold story of industry stalwarts and disruptors, inventors, and administrators racing to invent modern agriculture—a power farming revolution that would usher in a whole new world.

The Amazing Appleknockers Anne Ryman 2011-05-01 In 1964, Cobden was a quiet village of 900 residents tucked in the Shawnee Hills of southern Illinois. The high school's basketball team changed that, grabbing the attention of sports fans throughout Illinois as it made a dramatic run to the finals of the Illinois state high school basketball tournament. An unusually tall and talented team with a catchy mascot, the Appleknockers, Cobden played at a time before schools were divided into classes based on enrollment. The school had just 147 students, and the Appleknockers defeated schools that were many times their size as they moved along the tournament trail.This true account traces the background of the Appleknockers' coach, Dick Ruggles, and how a young man from Boston wound up coaching in the hillside farming community. The story covers the two years that Ruggles served as Cobden's coach, the two most successful basketball seasons in the school's history. It also reveals the obstacles, tragedies, and triumphs the players faced, both on and off the basketball court. The achievements of the Appleknockers were widely covered in newspapers from Evansville, Indiana, to St. Louis, Missouri, to Chicago. Their readers were drawn to the underdog team, and the Appleknockers moved from the sports pages into Illinois folklore. People from Illinois and the

surrounding states are still talking about the Appleknockers nearly a half century later, which speaks to the enduring and far-reaching appeal of this team and its story.
