AAON RK SERIES

The burner area is not sealed and combustion air is supplied by a centrifugal blower which draws in fresh air through a protected opening. This air is introduced into the burner tubes by the action of the induced draft blower. This insures an even flow of primary and second-ary air to the burners. The heating system and safety controls are 100% ...

Generac Automatic Transfer Switch Owners Manual

air conditioner loads and 4 other loads. The OPCB manages the loads by “shedding” the connected loads in the event of a drop in generator frequency (overload). Loads to be “shed” are grouped in 4 priority levels on the OPCB. • Priority 1 and 2 has connections for both one air conditioner and one contactor.
