**Garibaldi** Lucy Riall 2008-10-20 Giuseppe Garibaldi, the Italian revolutionary leader and popular hero, was among the best-known figures of the nineteenth century. This book seeks to examine his life and the making of his cult, to assess its impact, and understand its surprising success. For thirty years Garibaldi was involved in every combative event in Italy. His greatest moment came in 1860, when he defended a revolution in Sicily and provoked the collapse of the Bourbon monarchy, the overthrow of papal power in central Italy, and the creation of the Italian nation state. It made him a global icon, representing strength, bravery, manliness, saintliness, and a spirit of adventure. Handsome, flamboyant, and sexually attractive, he was worshiped in life and became a cult figure after his death in 1882. Lucy Riall shows that the emerging cult of Garibaldi was initially conceived by revolutionaries intent on overthrowing the status quo, that it was also the result of a collaborative effort involving writers, artists, actors, and publishers, and that it became genuinely and enduringly popular among a broad public. The book demonstrates that Garibaldi played an integral part in fashioning and promoting himself as a new kind of "charismatic" political hero. It analyzes the way the Garibaldi myth has been harnessed both to legitimize and to challenge national political structures. And it identifies elements of Garibaldi's political style appropriated by political leaders around the world, including Mussolini and Che Guevara.

**Islamic Perspectives on Science and Technology** Mohammad

Hashim Kamali 2016-04-25 This book presents 25 selected papers from the International Conference on "Developing Synergies between Islam & Science and Technology for Mankind's Benefit" held at the International Institute for Advanced Islamic Studies Malaysia, Kuala Lumpur, in October 2014. The papers cover a broad range of issues reflecting the main conference themes: Cosmology and the Universe, Philosophy of Science and the Emergence of Biological Systems, Principles and Applications of Tawhidic Science, Medical Applications of Tawhidic Science and Bioethics, and the History and Teaching of Science from an Islamic Perspective. Highlighting the relationships between the Islamic religious worldview and the physical sciences, the book challenges secularist paradigms on the study of Science and Technology. Integrating metaphysical perspectives of Science, topics include Islamic approaches to S&T such as an Islamic epistemology of the philosophy of science, a new quantum theory, environmental care, avoiding wasteful

consumption using Islamic teachings, and emotional-blasting psychological therapy. Eminent contributing scholars include Osman Bakar, Mohammad Hashim Kamali, Mehdi Golshani, Mohd. Kamal Hassan, Adi Setia and Malik Badri. The book is essential reading for a broad group of academics and practitioners, from Islamic scholars and social scientists to (physical) scientists and engineers.
