Compaq User's Handbook Louis E. Frenzel 1984

TruCluster Server Handbook Scott Fafrak 2003-01-10 The TruCluster Server Handbook authoritatively details how to plan, design, install, configure, and administer a cluster of Tru64 UNIX systems. The book explains how to configure and optimize

hardware underlying a TruCluster server, including storage servers so critical to running a high-end cluster operation. This book provides best practices and techniques drawn from the authors' extensive experiences in the field with systems designers, systems managers, developers, and users. The authors include a former Tru64 UNIX Technical Group Leader with HP's Consulting Division and a top industry figure, and two former TruCluster Server Team Leaders with the Customer Support Center. Learn to install TruCluster Server from the ground up Get the most out of your cluster environment with the authors' practical tips and tricks Attain availability, scalability, and simplified manageability in your IT systems operation

Compaq Visual Fortran Norman Lawrence 2002-01-08 Compaq Visual Fortran: A Guide to Creating Windows Applications is the only book that shows developers how to create Windows applications using Visual Fortran software. It complements Digital Press's successful reference, the Digital Visual Fortran Programmer's Guide. Lawrence details development methods and techniques for creating Fortran applications for Windows, the platform upon which developers can use Compaq Visual Fortran (CVF; to be Intel Visual Fortran in the future) to create applications. The book teaches CVF programming progressively, beginning with simple tasks and building up to writing professional-level Win32 applications. Readers will learn about the powerful new CVF graphical user interface, as well as the intricacies of Windows development from a CVF perspective. They can master QuickWin, the Win32 APIs including multiple document interfaces, and Open GL with 3D and interactive graphics. Provides practical, step-by-step instructions for developing Visual Fortran applications Only tutorial text for Compaq Visual Fortran (CVF) Doesn't require the programmer to learn C or C++

Manual of Commercial Methods in Clinical Microbiology Allan L. Truant 2001-12-18 A general resource for all subdisciplines of clinical microbiology to use when evaluating commercial methods,

tests, or procedures. • Reviews all the commercially available tests (both manual and automated) in the discipline of clinical microbiology. • Includes a description of the sensitivities, specificities, and predictive values from peer-reviewed sources. • Features separate chapters devoted to molecular microbiology, information management, emerging infectious diseases, and veterinary clinical microbiology.

Producer Price Index Manual International Monetary Fund

2004-09-03 The producer price index (PPI) measures the rate at which the prices of producer goods and services are changing overtime. It is a key statistic for economic and business decision making and inflation monitoring. The Producer Price Index Manual: Theory and Practice provides clear, up-to-date guidance on the concepts, uses, methods, and economic theory of the PPI, including information on classifications, sources, compilation techniques, and analytical uses of the PPI. The Manual supersedes the previous international guidance on PPIs (available in the Manual on Producers' Price Indices for Industrial Goods, published by the United Nations Statistics Division in 1979). The Manual's conceptual framework derives from the System of National Accounts 1993 and recent developments in index number theory. Preparation of the Manual was undertaken by the Intersecretariat Working Group on Price Statistics through a technical expert group chaired by the IMF and involving representatives from the ILO, the OECD, the UN Economic Commission for Europe, the World Bank, national statistical offices, and academic institutions.

Getting Started with OpenVMS System Management David Miller 2003-05-08 Getting Started with OpenVMS System Management gives new VMS system managers a jumpstart in managing this powerful and reliable operating system. Dave Miller describes the essentials of what an OpenVMS System Manager will have to manage. He defines areas of OpenVMS System Management and describes why each is important and how it fits into the larger management task. Even though some OpenVMS management

concepts are unique (for instance quotas), many concepts (such as account creation) have counterparts in UNIX and Windows NT. So, wherever possible, Miller points out to his readers the parallel to other systems. The book is intended as a precursor to Baldwin's OpenVMS System Management Guide and various OpenVMS documents. Thus it refers the reader to other books for the detailed management steps. Getting Started with OpenVMS System Management is a great introduction to the material Steve Hoffman and Dave Miller are revising for the OpenVMS System Management Guide, 2E. · Permits experienced system managers to begin managing OpenVMS more quickly · Dovetails with other Digital Press publications for easier reference by the OpenVMS manager · Points you in the right direction for the complete documentation on each issue · **BONUS FEATURE!** Includes excerpts from five key DP OpenVMS books

Computer Buyer's Guide and Handbook 1998

Consumer Price Index Manual International Labour Office
2004-08-25 The consumer price index (CPI) measures the rate at which prices of consumer goods and services change over time. It is used as a key indicator of economic performance, as well as in the setting of monetary and socio-economic policy such as indexation of wages and social security benefits, purchasing power parities and inflation measures. This manual contains methodological guidelines for statistical offices and other agencies responsible for constructing and calculating CPIs, and also examines underlying economic and statistical concepts involved.

Topics covered include: expenditure weights, sampling, price collection, quality adjustment, sampling, price indices calculations, errors and bias, organisation and management, dissemination, index number theory, durables and user costs.
